Subject Index For Volume 38

ADP/ATPase in glomerular filtration barrier (abst) 361
ADPKD
  congenital hepatic fibrosis 880
  lifespan (abst) 1238
  renal structure, hypertension 1177
  symptomatic forms (abst) 1237
AN69 membrane, anaphylactoid reactions 982
ANCA titer in therapy of Wegener's granulomatosis (abst) 364
ATPase
  adrenergic regulation of (Na^+,K^+) 402
  vacuolar proton pumps 649
Ablation, renal damage, hypertension 642
Acid
  disorders of distal acidification 720
  load removal, ketoacidosis in fasting 507
Acid-base
  homeostasis, reclamation of filtered bicarbonate 584
  regulation, single nephron studies 744
  renal handling of citrate 728
  status, collecting duct intercalated cells 668
Acidification
  vacuolar proton pump 649
Acidosis
  chronic respiratory, urinary Ca excretion 409
  disorders of distal acidification 720
Acute glomerulonephritis, hyperkalemia 1159
Acute pyelonephritis (abst) 546
Acute renal failure
  active cation transport in uremia 1061
  chromate induced (abst) 1236
  drug induced (abst) 1237
  erythrocyte trapping 432
  hemofiltration (abst) 559
  radiocontrast-induced nephropathy 1101
  reactive oxygen metabolites 1125
  regional citrate anticoagulation in CAVHD 976
  somatosensory evoked potentials 1085
  survival of renal allografts (abst) 360
  uninephrectomy (abst) 359
  Wegener's granulomatosis (abst) 548
Acute uric acid nephropathy (abst) 367
Adenosine
  ecto 5′-nucleotidase is main source of (abst) 366
Adrenoreceptor, angiotensin II 30:S-84
Afferent arterioles, renin release 426
Albumin, edema formation in diabetic nephropathy 1187
Albuminuria
  perindopril vs. triple therapy (abst) 552
  steroid-responsive SIRS production 151
Albuterol, insulin treatment of hyperkalemia 869
Aldosterone
  action and hypokalemia 812
  adjustment to K loading in humans 942
  felodipine (abst) 1232
Alkaline phosphatase
  in dialysis (abst) 362
  intestinal, mercury exposed and analgesic abusers (abst) 363
Alkalosis, respiratory, PTH 258
Allograft
  live donor (abst) 560
  survival and ARF (abst) 360
Alpha-adrenoceptor subtype, clonidine 80
Alport's syndrome
  gene mapping 925
Aluminum
  bone matrix inductive properties 1141
  calcium acetate or calcium citrate, intestinal absorption 937
  urine net charge an index of urinary (abst) 367
Amino acids
  plasma and muscle free, HD 108
  taurine transport in epithelial cell lines 219
Aminophylline infusion and glucose in uremia 1146
Amyloid deposit imaging in dialysis 1169
Analgesic nephropathy rates in Switzerland (abst) 369
Anaphylactoid reactions, AN69 membrane 982
Anemia
  cutaneous blood flow, rHuEPO 919
  i.v. and s.c. administration of rHuEPO (abst) 372
  rHuEPO improves brain function 480
Angiotensin
  biology of renin-, system S-18
  genetic hypertension 30:S-92
  receptor, signaling mechanisms 30:S-43
  renal vascular hypertension 30:S-97
Angiotensin I
  forming angiotensinogenases in vasculature 30:S-28
  renal metabolism 30:S-24
Angiotensin II
  adrenergic influences 30:S-84
  arteriolar renin, juxtamedullary nephron 30:S-60
  biology of renin-angiotensin system 30:S-18
  calcium-activated Cl conductance 30:S-48
  cortical, juxtamedullary arterioles, norepinephrine 30:S-55
  distal part of afferent arteriole, morphology 30:S-10
  glomerular growth 1068
  hemodynamics and congestive heart failure 30:S-123
  hemodynamics, tubular reabsorption 30:S-69
  influences phospholipase A2 ..... 30:S-43
  inhibits ANP (abst) 551
  intracellular Ca and electrical function 30:S-51
  intrarenal effects with ANF 30:S-87
  lisinopril (abst) 1230
  pressor agents on TGF 30:S-77
  receptor antagonist, DuP 753 473
  receptor expression (abst) 554
  receptor regulation in anti-GBM nephritis 518
  release from juxtaglomerular cells 30:S-33
  renal ablation 862
  renal artery narrowing, BP, GFR 30:S-109
  renal metabolism 30:S-24
  renin release from juxtaglomerular apparatus 30:S-38
  saralasin, CEI, hemodynamics 30:S-74
  structure of glomerular mesangium 30:S-2

thromboxane, BP 30:S-81
Angiotensin converting enzyme inhibition
anemia, in transplants (abst) 561
antiproteinuric effect (abst) 1230
diabetic nephropathy, salt (abst) 553
Angiotensin converting enzyme inhibitor
anaphylactoid reactions during HD 982
Benazepril 101
glomerular growth 1068
human growth hormone and GFR (abst) 368
progression of CRF 30:S-118
Angiotensinase A, renal ablation 862
Anti-GBM disease
effects of deoxyspergualin (abst) 556
granulocytes in heterologous 86
lymph drainage (abst) 556
macrophages and crescent formation (abst) 555
procoagulant activity (abst) 557
Anti-neutrophil cytoplasmic autoantibody
associated renal disease 998
Antibodies
anti-lung induced Goodpasture's syndrome (abst) 557
anti-neutrophil cytoplasmic, IgG_4 subclass (abst) 364
associated renal disease, ANCA 998
hepatitis B vaccination, IL-2 receptors, CRF 1164
hepatitis C assay 320
HTLV-1 in Aboriginals with renal failure (abst) 548
immune complex formation and clearance 1075
T and B cell, HLA match (abst) 1234
Antigen
class II, ICAM-1 function 417
heat shock protein, 90-kDa 830
HLA, dialysis membranes and B2m expression 962
isolation of GBM (abst) 1232
nitrite in nephrotoxicity 1056
presenting cells, mesangial accessory functions 1039
rHuEPO and sensitivity to HLA 12
Antioxidants, ischemic injury 1109
Apoptosis, atrophy, renal papillary necrosis (abst) 554
Arginine vasopressin
gene expression in heart failure 818
interaction with Ang II on Ca^{2+} 47
Arteriole
afferent, renin-secreting segment 30:S-65
distal part, morphology 30:S-10
Arteriovenous fistulae, predictors of outcome (abst) 559
Atenosine triphosphate, image-guided ^{31}P MRS of
kidneys 294
Atrial natriuretic factor
angiotensin II 30:S-87
blood pressure control (abst) 359
endopeptidase inhibition 67
in acute nephritic and nephrotic syndromes 512
inhibits hypertonic saline-mediated hemodynamic
decreases 227
metabolism of Ang I and Ang II 30:S-24
radiocontrast induced nephropathy 1101
syndrome of deficiency (abst) 365
Atrial natriuretic peptide
blunts hypoxemia-induced decrease in GFR (abst) 365
cyclic GMP (abst) 1231
inhibition by Ang II (abst) 551
receptors during salt loading 73
renin essential hypertension 30:S-107
role of dopamine 1133
vasodilator theophylline (abst) 361
Auto-immune glomerulonephritis
murine host-vs.-graft reaction (abst) 1230
Autocrine growth factor, interleukin-6 249
Autoimmunity in IgAN, gene 332
Autoradiography of adrenergic receptors 39
Autoregulation
distal portion of afferent arteriole, morphology 30:S-10
glomerular blood flow 769
renal circulation 571

Benazepril, ACE inhibitor 101
11Beta-hydroxysteroid dehydrogenase, Na transport 673
Beta 2-microglobulin
dialysis membranes 962
imaging of amyloid deposits 1169
Beta amino acid transporter, taurine 219
Beta blockade, propranolol in respiratory alkalosis 258
Bicarbonate
absorption, model of proximal tubule 605
collecting duct intercalated cells 668
disorders of distal acidification 720
reclamation of filtered 584
Binding sites, bradykinin (abst) 1237
Biocompatability in hemodialysis membranes 487
Biopsy
immunoregulatory factors in IgAN 1216
real time, ultrasonic guidance, semiautomated device 347
renal (Nephrology Forum) 529
renal, in elderly (abst) 1236
ten year retrospective analysis (abst) 546
zero-hour, morphologic findings (abst) 372
Blood
coagulation, thrombin 956
conjugated estrogens and platelet function in CRF 1181
cutaneous flow, coagulability, rHuEPO 919
fistula dysfunction, high-efficiency HD 337
flow, Ang II receptors in anti-GBM nephritis 518
levels with cyclosporine (abst) 363
red cell trapping, ischemic renal failure 432
renal corticomedullary portal systems (abst) 550
renin release from juxtaglomerular apparatus 30:S-38
vessels, renin release 612
volume monitoring during HD 342
zeranol shortens bleeding time in uremia 96
Blood flow
congestive heart failure, Ang II 30:S-123
glomerular 769
juxtamedullary, NE and Ang II effect 30:S-55
mesangial cell accessory functions 1039
serotonin blocking agent, hemodynamics 823
Blood pressure
angiotensin II and ANF 30:S-87
angiotensinogenases in vasculature 30:S-28
biology of renin-angiotensin system 30:S-18
control and ANF (abst) 359
distal part of afferent arteriole, morphology 30:S-10
high-efficiency L-lactate HD 896
immunoregulation in IgAN 1216
management in home HD (abst) 559
renal structure, hypertension in ADPKD 1177
renal vascular hypertension, angiotensin 30:S-97
thromboxane and Ang II 30:S-81
Bone
analysis of plasma vitamin D metabolites 29:S-28

crystallization inhibitors, mineral regulation 625
disease 193
effects of $1,25(OH)_2D_3$ therapy 29:S-48
matrix inductive properties (Al) 1141
mineral density in transplantation (abst) 371
oral and parenteral calcitriol in osteodystrophy ... 29:S-54
parathyroidectomy in CRF, calcitriol 29:S-62
renal control of extracellular Ca 700
vitamin D 29:S-17
Bradykinin, binding (abst) 1237
Brain function, rHuEPO therapy improves 480
Brush border membrane
ANP inhibits Na^+-H^+ antiport, dopamine 1133
vesicles studied by cytometry 5

CAPD
campylobacter peritonitis (abst) 559
cellular cytokine production 129
glucose resorption, lymphatic absorption (abst) 362
immunoadsorption and transplantation 350
loss of ultrafiltration capacity, peritoneal transport 495
variation in dialysate volume 465
CAVHD, regional citrate anticoagulation 976
CR1 (CD)35 mRNA in podocytes 289
Calcification
bone matrix inductive properties, Al 1141
soft tissue, in ESRD children 931
Calcitriol
extrarenal production 29:S-36
immunomodulating properties 29:S-9
oral and parenteral, osteodystrophy 29:S-54
parathyroidectomy in CRF 29:S-62
Calcium
activated Cl conductance of mesangial cells 30:S-48
active analogues of vitamin D 29:S-22
arginine vasopressin and Ang II interaction on 47
calmodulin, protein kinase II 63
channel blockade, hypertension (abst) 553
cytosolic free, mesangial cells 1199
entry blockers, influx (abst) 1232
excretion, chronic respiratory acidosis 409
intracellular, electral function and Ang II 30:S-51
ionized, dialysis membranes, iPTH assays in HD 308
parathyroid-calcitriol axis in CRF 29:S-41
renal control of extracellular 700
tracer kinetics of vitamin D_3 857
Calcium acetate, intestinal Al absorption 937
Calcium citrate, acetate effect on Al absorption 937
Captopril
compared with enalapril (abst) 546
converting enzyme inhibition, GFR, proteinuria 590
renal artery stenosis (abst) 544
Carcinoma and IGAN (abst) 1237
Carnitine
concentrations, lipid effects of L-carnitine in HD 904
Catheter
diagnosis of pyelonephritis 835
predictive value of ureteric, infection 546
prophylactic filling with heparin or urokinase (abst) ... 370
right atrial (abst) 558
Cation in transport, uremia 1061
Cell
class II antigens and ICAM-1 function 417
epithelial polarity 1
glomerular mesangium, structure 30:S-2
growth, TGF-β_1 and TGF-β_2 1095
oxygen molecule-mediated injury 785
volume regulation, TALH 1019
Cellular cytokine production, renal replacement 129
Children
steroid-sensitive nephrotic syndrome 145
twenty year's experience in transplantation (abst) 561
Chimeric mammalian kidney 991
Chloride
conductance of mesangial cells, Ca activated 30:S-48
transport across the IMCD 654
Cholangiocarcinoma model of jaundice 948
Chromate induced ARF (abst) 1236
Chronic cardiac failure, AVP gene expression 818
Chronic renal failure
branched-chain ketoacids 595
cation transport in uremia 1061
children, recombinant growth hormone (abst) 548
conjugated estrogens 1181
converting enzyme inhibition 590
dysfunction of NADPH-oxidase (abst) 361
estrogens, platelet function and prostacyclin 1181
extrarenal production of calcitriol 29:S-36
final height in children (abst) 369
hepatitis B vaccination and IL-2 receptors 1164
in Aboriginal population (abst) 545
L-carnitine in HD, concentrations and lipids 904
measurement of renal function 167
parathyroid-calcitriol axis 29:S-41
parathyroidectomy 29:S-62
plasma osmolality causes hyperkalemia 301
progression and ACEI 30:S-118
pyrimidine metabolism (abst) 362
renal biopsy 529
tracer kinetics of vitamin D_3 857
tubulointerstitial nephritis 736
vitamin D therapy effect on bone 29:S-48
Chronic respiratory acidosis 409
Circadian rhythms of C_{in} and C_{cr} (abst) 1231
Cisplatin, late renal sequelae (abst) 365
Citrate
regional anticoagulation, CAVHD 976
renal handling 728
Clearance
inulin and creatinine, circadian rhythms (abst) 1231
obstructive jaundice 948
renal function reserve (abst) 1231
tubular immune complex formation 1075
Clonidine inhibits fluid absorption in PCT 80
Collagen, vitamin D and bone 29:S-17
Collecting duct
countercurrent system 695
intercalated cells 668
sodium and potassium transport 679
Contractile filaments in glomerular mesangium 30:S-2
Convective transport 19
Converting enzyme inhibition
renin-angiotensin system, transplantation 30:S-114
saralasin, Ang II, hemodynamics 30:S-74
Cortical collecting duct
mechanism of PGE_2 and vasopressin interactions 618
mineralocorticoids during hypokalemia 812
sodium and potassium transport 679
Corticomedullary portal systems (abst) 550
Corticosteroid receptors, mineralocorticoid specificity ... 673

Countercurrent system 695
Creatinine
measuring renal function in CRF 167
renal structure, hypertension in ADPKD 1177
Crescentic glomerulonephritis
IL-2R mononuclear cell (abst) 556
interstitial IL-2R+ mononuclear cells (abst) 554
Crescents, ANCA associated renal disease 998
cyclic AMP, insulin secretion in uremia 1146
cyclic GMP, ontogeny by ANP (abst) 1231
Crystal inhibitors, mineral regulation 625
Cyclosporin A
cytokine production, survival, IL-2R (abst) 560
glomerular hemostatic changes (abst) 367
host defence in infection (abst) 556
ketokonazole interaction, glucose intolerance (abst) ... 371
Cyclosporine
blood levels with oral or capsules (abst) 363
cadaver kidney transplantation (abst) 560
calcium channel blocker (abst) 553
immediate hemodynamic effects (abst) 1233
Cyst, renal structure, hypertension in ADPKD 1177
Cysteine
proteinases, GBM degradation 395
Cytokines
in nephrotic syndrome (abst) 557
Cytometry of BBM 5
Cytoskeleton
mesangial cell contraction by TNF 795

DMSA scintigraphy, urinary tract infection (abst) 544
Deoxyspergualin
cytotoxic T lymphocytes (abst) 557
Desferrioxamine
enhances response to rHuEPO (abst) 545
Desoxyspergualin, anti-GBM nephritis (abst) 556
Diabetes
familial, sodium-lithium countertransport (abst) 361
low sodium diet, hyperfiltration (abst) 550
Diabetes mellitus
determinants of renal damage, hypertension 642
glomerular permeability to macromolecules 384
in Aboriginal population (abst) 545
increased mortality post-transplantation (abst) 363
lithium marker (abst) 551
proximal tubule cell Na transport (abst) 548
Diabetic nephropathy
edema 1187
hyperlipidemia and hypertension (abst) 553
salt, ACE inhibition (abst) 553
Dialysate
calcium acetate, citrate, Al absorption 937
L-lactate in high-efficiency HD 896
variation in volume in CAPD 465
Dialysis
alkaline phosphatase (abst) 362
fistula dysfunction, high-efficiency 337
membranes, β_2-m expression 962
peritonitis-induced drop-outs (abst) 362
recovery of renal function (abst) 373
related AB-amyloid deposits 1169
transplantation in Aboriginal population (abst) 545
Dialysis membranes
iPTH values 308
prophylactic filling with heparin or urokinase (abst) ... 370
Dialyzer
anaphylactoid reactions, AN69 membrane, ACEI 982
β_2-microglobulin levels (abst) 558
blood and dialysis membranes, protein catabolism 487
blood protein monitoring during HD 342
induction of IL-1 during HD 1089
membranes, β_2m expression 962
reprocessing with Renalin (abst) 558
Diet
acid-base regulation 744
adjustment to K loading in humans 942
antioxidants and ischemic injury 1109
branched-chain ketoacids 595
fatty acids in transplantation (abst) 1233
fish oil supplements 315
protein effect on renin-angiotensin system 240
removal of inorganic acid load with fasting 507
renal, hormonal responses to animal & veg proteins .. 136
Distal acidification, disorders 720
Distal nephron
lithium treatment, kallikrein excretion 124
Distal segment of afferent arteriole 30:S-10
Diuretic, renal effects of 632
Dopamine
ANP inhibits antiport in BBM 1133
urodilation, ischemic renal failure (abst) 365
Drug induced ARF (abst) 1237
DuP 753, nonpeptide angiotensin II receptor antagonist . 473

Ecto 5′-nucleotidase and renal adenosine (abst) 366
Edema
formation in diabetic nephropathy 1187
management of refractory (abst) 546
renal biopsy 529
Eicosanoids
cell injury 273
mesangial proliferation 232
regulation of renin release 612
Electrolytes
macula densa-mediated hemodynamics 1206
nl measurement by ion specific microelectrodes 525
End-stage renal disease
analgesic nephropathy (abst) 369
cellular cytokine production 129
gene mapping in Alport's syndrome 925
life span of ADPKD (abst) 1238
survival rate (abst) 1236
tubulointerstitial nephritis 736
End-stage renal failure
bone disease 193
determinants of renal damage, hypertension 642
final height in children with (abst) 369
growth velocity in children, rHuEPO (abst) 547
immunoadsorption in sensitized transplant recipient ... 350
low dose rHuEPO therapy (abst) 544
permselectivity in glomerulosclerosis 384
radioimmunoassay for rHuEPO 969
soft tissue calcification in children with 931
vascular heparan sulphate (abst) 555
Endopeptidase inhibition and ANF 67
Endoproteinase, cysteine in GBM 395
Endothelial cell
molecules, GBM (abst) 554
oxygen molecule-mediated injury 785

Endothelin
hemodynamics (abst) ... 550
sodium excretion (abst) ... 549
stimulates PDGF secretion ... 1193
vasoconstrictor (abst) ... 550
Endotoxin
induction of IL-1 during HD ... 1089
reactive oxygen metabolites in ARF ... 1125
Entactin, possible auto-antigen ... 263
Enzyme
angiotensinogenases in vasculature ... 30:S-28
antioxidant role in oxidant injury ... 282
calcium-calmodulin protein kinase II ... 63
kallikrein excretion rate, lithium ... 124
metabolism on Ang I and Ang II ... 30:S-24
secretion of renin, IRR in vivo ... 440
vacuolar proton pump ... 649
Epithelial cell
class II antigens, ICAM-1 ... 417
injury, Ca and protein kinase C ... 803
membrane polarity organization in ... 1
taurine transport in renal cell lines ... 219
three-D morphology of segmental glomerulosclerosis ... 851
Erythremia post-transplantation (abst) ... 1233
Erythrocyte
trapping, ischemic renal failure ... 432
Erythropoietin
application in HD (abst) ... 370
improves brain function ... 480
Estrogen
conjugated, platelet function and prostacyclin ... 1181
receptor blocking, zeranol in uremia ... 96
Exchanger, Na^+/Ca^{2+} in mesangial cells ... 1199
Excretion
adjustment to K loading in humans ... 942
calcium, chronic respiratory acidosis ... 409
kallikrein, regulation by glucocorticoids ... 212
Exercise
tolerance, L-carnitine ... 912
white collar rhabdomyolysis ... 709
Exocytosis, renin release ... 30:S-38
Extracellular matrix
formation by mesangial cells (abst) ... 360

Fasting, ketoacidosis ... 507
Fatty acids
L-carnitine, lipids in HD ... 904
clinical and biochemical effects of L-carnitine ... 912
Felodipine, aldosterone (abst) ... 1232
Fibrinolytic system, thrombin ... 956
Fibrosis
congenital hepatic, in ADPKD ... 880
hepatic, PKD (abst) ... 547
Fish oil, during rejection (abst) ... 1232
Fistula
dysfunction, high-efficiency HD ... 337
Flow cytometry to study BBMV ... 5
Fluorescence
activated cell sorting, proximal tubules (abst) ... 359
flow cytometry ... 5
Focal glomerulosclerosis
hypertrophy in MCD predicts progression to ... 115
Fosinopril in hypertension ... 873
Free radical
probucol effect in ureteral obstruction ... 843
Furosemide
renin essential hypertension, ANP ... 30:S-107

G protein
mesangial cell growth, retinoic acid (abst) ... 551
Gangrene with hyperparathyroidism in HD (abst) ... 370
Gene
chimeric mammalian kidney ... 991
expression, vitamin D system ... 29:S-2
hepatic fibrosis in ADPKD ... 880
immunoglobulin heavy chain switch region, IgAN ... 332
mapping of Alport families ... 925
Gentamicin
toxicity in S3 segment, ischemia ... 459
Glomerular basement membrane
characteristics of Na^+/Ca^{2+} exchanger ... 1199
degradation by systein proteinases ... 395
endothelial cell molecules (abst) ... 554
entactin, Goodpasture anti-GBM nephritis ... 263
isolation of mouse (abst) ... 1232
mesangial matrix ultrastructure ... 1211
structure of glomerular mesangium ... 30:S-2
Glomerular filtration rate
acid-base regulation ... 744
ADP/ATPase in barrier (abst) ... 361
adrenergic influences, Ang II ... 30:S-84
adrenergic receptors ... 39
blood flow ... 769
blood flow, artery narrowing, Ang II ... 30:S-109
calcium-activated Cl conductance ... 30:S-48
captopril ... 590
chimeric mammalian kidney ... 991
congestive heart failure, Ang II ... 30:S-123
effects of ANF ... 227
eicosanoids and mesangial cell injury ... 273
endothelin, PDGF secretion ... 1193
extracellular space in macula densa ... 30:S-16
fosinopril ... 873
hemostatic changes in CsA toxicity (abst) ... 367
human growth hormone (abst) ... 368
in Milan hypertensive rats, TGF ... 30:S-102
ischemic renal failure, erythrocyte trapping ... 432
kallikrein regulation by glucocorticoids ... 212
measurement of renal function ... 167
plasma oncotic pressure (abst) ... 551
radiocontrast induced nephropathy ... 1101
renal function reserve (abst) ... 1231
serotonin blocking agent ... 823
Glomerulonephritis
ANCA associated renal disease ... 998
ANF ... 512
anti-GBM, Ang II receptor regulation ... 518
anti-GBM, role of granulocytes ... 86
hyperkalemia, transient hyporeninemic hypoaldosteronism ... 1159
immunoglobulin switch region RFLPs ... 332
impairment of renal function with IgG (abst) ... 369
in Australian city, 10 year study (abst) ... 546
mesangial cell accessory functions ... 1039
renal biopsy ... 529
segmental, morphology ... 851
Glomerulosclerosis
altered glomerular permeability to macromolecules ... 384
angiogenic action of Ang II in glomerular growth ... 1068
thromboxane A_2 role in progressive kidney disease ... 447

Glomerulus
glomerular blood flow ... 769
Glucocorticoids
kallikrein regulation ... 212
Glucose
induced insulin secretion in uremia ... 1146
lymphatic absorption in children on CAPD (abst) ... 362
Glycoprotein
CR1 (CD 35) mRNA in podocytes ... 289
renin content after renin secretion ... 440
anti-GBM nephritis, entactin ... 263
Goodpasture's syndrome
anti-lung antibody induces (abst) ... 557
anti-GBM nephritis, entactin ... 263
Graft-vs.-host disease
dipeptidyl peptidase IV and laminin (abst) ... 1232
Growth
angiogenic action of Ang II on glomerular ... 1068
Growth factor
β_1 and β_2 in glomeruli ... 1095
interleukin-6 in mesangial cells ... 249

H-K-ATPase
immunoreactivity in CCD, OMCD ... 985
HLA
antibodies, immunoadsorption and transplantation ... 350
identical siblings, acute TIN (abst) ... 369
extended haplotypes, childhood steroid-sensitive NS ... 145
match, T and B cell antibodies (abst) ... 1234
sentization and rHuEPO ... 12
HSP 90 localization ... 830
Heart failure
angiotensin II, hemodynamics ... 30:S-123
arginine vasopressin gene expression ... 818
management of refractory edema (abst) ... 546
radiocontrast induced nephropathy ... 1101
Heat shock protein, 90-kDa ... 839
Hematuria
immunoregulation in IgAN ... 1216
renal biopsy ... 529
Hemodialysis
activity of SLE (abst) ... 1234
albuteral and insulin treatment of hyperkalemia ... 869
amyloid deposit imaging with 131B2m ... 1169
anaphylactoid reactions, ACEI ... 982
β_2 microglobulin levels (abst) ... 558
biocompatability ... 487
blood protein monitor ... 342
bone disease ... 193
cellular cytokine production ... 129
cutaneous blood flow, rHuEPO ... 919
cutaneous gangrene (abst) ... 370
erythropoietin (abst) ... 370
hepatitis C (abst) ... 558
hepatitis C infection ... 320
high efficiency, fistula dysfunction ... 337
home, BP management (abst) ... 559
i.v. and s.c. administration of rHuEPO (abst) ... 372
iPTH values during ... 308
immunoadsorption in sensitized transplant recipient ... 350
interleukin-1 induction ... 1089
L-carnitine, biochemical effects ... 912
lipid effects and carnitine in L-carnitine HD ... 904
membranes, β_2-m expression ... 962
plasma and muscle free amino acids ... 108
plasma exchange with rotating filter ... 160
predictors of arteriovenous fistulae (abst) ... 559
prophylactic filling of catheters with heparin (abst) ... 370
quality of life with rHuEPO (abst) ... 548
rHuEPO improves brain function ... 480
recovery of renal function (abst) ... 372
renal biopsy ... 529
sterile infusate, pre-dilution hemofiltration (abst) ... 559
Hemodynamics
adrenergic influences, Ang II ... 30:S-84
ANF inhibits hypertonic saline-mediated decreases in ... 227
angiotensin II and heart failure ... 30:S-123
biology of renin-angiotensin system ... 30:S-18
calcium-activated Cl conductance ... 30:S-48
contraction of mesangial cells by TNF ... 795
endothelin (abst) ... 550
glomerular growth of kidneys, Ang II ... 1068
immediate effects of CsA (abst) ... 1233
in Milan hypertensive rats, TGF ... 30:S-102
ingestion of animal, vegetable protein ... 136
macula densa-mediated glomerular ... 1206
n-3 fatty acids and PGE metabolism ... 315
new ACE inhibitor, Benazepril ... 101
obstructive jaundice ... 948
of L-lactate high efficiency HD ... 896
physiologic adaptations of TGF ... 577
renal ablation, angiotensinase A ... 862
renal vascular hypertension, angiotensin ... 30:S-97
renin-angiotensin system, transplantation ... 30:S-114
renin-secreting segment of afferent arteriole ... 30:S-65
saralasin, Ang II, CEI ... 30:S-74
serotonin blocking agent ... 823
thromboxane, Ang II and BP ... 30:S-81
tubular reabsorption, Ang II ... 30:S-69
Hemofiltration
intensive care ARF unit (abst) ... 559
pre-dilution, sterile infusate (abst) ... 559
Hemoglobin, response to rHuEPO (abst) ... 545
Hemorrhage, regional citrate in CAVHD ... 976
Henle's loop, descending limb of ... 687
Heparin
antiproteinuric effects (abst) ... 1230
low molecular weight in HF (abst) ... 370
sulfate, monoclonal antibody (abst) ... 1229
vascular sulphate release in ESRF (abst) ... 555
Hepatitis B vaccination in IL-2 expression in CRF ... 1164
Hepatitis C
hemodialysis (abst) ... 558
infection in hemodialysis units ... 320
High efficiency hemodialysis, L-lactate ... 896
Homeostasis
disorders of distal acidification ... 720
renal effects of diuretics ... 632
tubuloglomerular feedback system ... 577
Hormone
active analogues of vitamin D ... 29:S-22
ANF in acute glomerulonephritis ... 512
atrial natriuretic factor and Ang II ... 30:S-87
AVP and Ang II interaction on Ca^{2+} ... 47
neutral endopeptidase inhibition, ANF ... 67
renin release by endothelium ... 612
sodium transport, 11B-hydroxysteroid dehydrogenase ... 673
vitamin D therapy ... 29:S-2

Human recombinant erythropoietin
desferrioxamine (abst) ... 545
growth velocity in children (abst) ... 547
quality of life (abst) ... 548
stimulates platelets and thrombosis (abst) ... 559
Hydrogen ion secretion, bicarbonate ... 584
Hydronephrotic kidney, renin synthesis (abst) ... 549
Hypercalciuria
chronic respiratory acidosis, Ca excretion ... 409
Hyperfiltration
determinants of renal damage ... 642
fosinopril ... 873
low sodium diet (abst) ... 550
pachydermoperiostosis (abst) ... 1236
Hyperkalemia
albuterol and insulin treatment ... 869
plasma osmolality increase causes ... 301
transient hyporeninemic hypoaldosteronism ... 1159
Hypermetabolism, protein restriction (abst) ... 549
Hyperparathyroidism
calcitriol treatment in osteodystrophy ... 29:S-54
Hyperphosphatemia
calcium acetate and citrate on Al absorption ... 937
Hypertension
active renin in pregnancy-induced (abst) ... 553
adrenergic regulation of (Na^+,K^+)-ATPase ... 402
angiogenic action of Ang II on glomerular growth ... 1068
angiotensin II, thromboxane, BP ... 30:S-81
angiotensinogenases in vasculature ... 30:S-28
antiproteinuric effect of ACEI (abst) ... 1230
captopril vs. enalapril (abst) ... 546
chronic tubulointerstitial nephritis ... 736
congenital hepatic fibrosis in ADPKD ... 880
determinants of renal damage ... 642
diabetic nephropathy, hyperlipidemia (abst) ... 553
edema formation in diabetic nephropathy ... 1197
fosinopril ... 873
genetic, Ang II ... 30:S-92
immunoregulation in IgAN ... 1216
kallikrein regulation by glucocorticoids ... 212
neutral endopeptidase and ANF ... 67
normotensive rat kidney model ... 28
preeclampsia prevention (abst) ... 544
pregnancy decidua (abst) ... 552
renal structure in ADPKD ... 1177
renal vascular, angiotensin ... 30:S-97
renal vascular, angiotensin ... 30:S-97
renin essential, ANP ... 30:S-107
syndrome of ANF deficiency in pre- (abst) ... 365
therapy with lisinopril (abst) ... 367
transplantation, renin-angiotensin system ... 30:S-114
tubuloglomerular feedback, Milan hypertensive rats ... 30:S-102
verapamil, renal damage (abst) ... 366
Hypertrophy
angiotensinase A, renal ablation ... 862
in MCD predicts progression to FGS ... 115
Hypoalbuminemia, ANF ... 512
Hypoaldosteronism
transient hyporeninemic, hyperkalemia ... 1159
Hypokalemia
kaliuretic response to mineralocorticoids ... 812
Hypolipidemia, L-carnitine in HD ... 904
Hypotension
clinical and biochemical effects of L-carnitine ... 912
Hypoxemia
induced decrease of GFR prevented by ANP (abst) ... 365
induced renal insufficiency (abst) ... 366
Hypoxia, effects on cultured cells (abst) ... 555

ICAM-1
class II antigens effect on tubular cells ... 417
IgA nephropathy
carcinoma (abst) ... 1237
immunoglobulin heavy chain switch region gene ... 332
immunoregulatory factors ... 1216
macrophage influx (abst) ... 1231
polymeric IgA and immune complex concentrations ... 323
IgG
subclass in anti-neutrophil cytoplasmic antibodies (abst) ... 364
therapy, impairment of renal function (abst) ... 369
Image-guided ^{31}P magnetic resonance spectroscopy ... 294
Immune complex
formation and clearance ... 1075
polymeric IgA in disease ... 323
Immune complex glomerulonephritis
leukocyte stimulation ... 1047
nitrite synthesis ... 1056
Immune modulation in TIN (abst) ... 556
Immune response in NS ... 151
Immune-mediated glomerulonephritis
mesangial cell accessory functions ... 1039
Immunoregulation, IgA nephropathy ... 1216
Immunosuppression
class II antigens, ICAM-1 regulation ... 417
Infection
acute pyelonephritis (abst) ... 547
catheterization to diagnose pyelonephritis ... 835
diagnosis, ureteric catheterization (abst) ... 546
host defence, CsA (abst) ... 556
netilmicin vs. b-lactam antibiotics (abst) ... 547
polymeric IgA and immune complex concentrations ... 323
Injury
Ang II receptors in anti-GBM nephritis ... 518
complement mediated, Ca, protein kinase C ... 803
diet deficiency of antioxidants ... 1109
entotoxin induced, ARF ... 1125
fosinopril treatment ... 873
immune-mediated mesangial cell ... 273
leukocyte stimulation, immune complex GN ... 1047
normotensive rat kidney model ... 28
oxidant, antioxidant enzymes ... 282
oxygen molecule-mediated ... 785
PAF receptor blockade in murine SLE ... 1030
progression of CRF, ACEI ... 30:S-118
white collar rhabdomyolysis ... 709
Inner medullary collecting duct
sodium and chloride transport ... 654
Insulin
albuterol treatment of hyperkalemia ... 869
no Na retention if potassium fall prevented (abst) ... 364
secretion in uremia, glucose-induced ... 1146
Integrins, cellular receptors for matrix proteins ... 886
Intercellular adhesion molecule-1 ... 1039
Interleukin, cellular cytokine production ... 129
Interleukin-1
induction during HD ... 1089
leukocyte stimulation, immune complex GN ... 1047
thrombomodulin, TNF (abst) ... 557

tubular reabsorption of Na and Ca (abst) 369
Interleukin-2
crescentic glomerulonephritis (abst)..... 554
hepatitis B vaccination, CRF..... 1164
Interstitial fibrosis, TIN 736
Interleukin-6..... 249
iPTH values during hemodialysis 308
Ischemia
antioxidant enzymes in oxidant injury..... 282
baboon model of preeclampsia (abst)..... 554
dietary deficiency of antioxidants 1109
oxygen molecule-mediated injury..... 785
Ischemic renal disease
gentamicin toxicity in S3 segment 459
nephron function..... 432

Jaundice, cholangiocarcinoma model 948
Juxtaglomerular apparatus
macula densa-mediated hemodynamics..... 1206
Juxtaglomerular cells
electrical function, Ang II and intracellular Ca.... 30:S-51
intracellular formation and release of Ang 30:S-33
regulation of renin release 30:S-38
renin-secreting segment of afferent arteriole..... 30:S-65
Juxtamedullary cells
glomerular blood flow..... 769
Juxtamedullary nephron
arteriolar renin, Ang II 30:S-60

Kaliuresis
adjustment to K loading in humans..... 942
Kallikrein
excretion rate, lithium 124
regulation by glucocorticoids..... 212
Ketaserin and hemodynamics..... 823
Ketoacid, branched-chain, protein metabolism..... 595
Ketoacidosis, chronic fasting..... 507
Kidney model, normotensive 28

L-carnitine
carnitine concentrations and lipid effects..... 904
clinical and biochemical effects 912
L-lactate
high efficiency hemodialysis..... 896
Lesion
ANCA associated renal disease 998
congenital hepatic fibrosis in ADPKD..... 880
glomerulosclerosis 384
membranous nephropathy, Bowmen's capsule (abst).. 363
sclerotic, 3-D morphology 851
thrombosis, lupus anticoagulant (abst)..... 1237
Leukocyte, stimulation, immune complex GN..... 1047
Limb of Henle
thick ascending, volume regulation..... 1019
Lipopolysaccharides, induction of IL-1 during HD 1089
Lisinopril
antihypertensive therapy (abst) 367
infusion of Ang II (abst)..... 1230
Lithium
kallikrein excretion rate 124
marker in diabetes mellitus (abst)..... 551
Liver, metabolism of PTH..... 55
Lymph drainage in anti-GBM disease (abst) 556
Lymphocyte
activation, symposium 381
serum sickness nephritis 1118
vitamin D..... 29:S-9

Macrophage
associated glomerular inflammation..... 1056
effect of vitamin D 29:S-9
crescent formation in anti-GBM disease (abst) 555
influx, IgAN (abst)..... 1231
Macula densa
extracellular space in mouse kidney 30:S-16
mediated glomerular hemodynamics 1206
Madin-Darby canine kidney
effect of hypoxia (abst) 555
Magnetic resonance spectroscopy
image-guided ^{31}P..... 294
Malnutrition
plasma and muscle free amino acids in HD..... 108
Matrix proteins, cellular receptors for..... 886
Medullary TALH, cell volume regulation 1019
Medullary collecting duct
H-K-ATPase immunoreactivity 985
Membranous nephropathy
lesions of Bowmen's capsule (abst) 363
Mercury
intestinal alkaline phosphatase, analgesic abusers (abst)..... 363
Mesangial cell
accessory functions 1039
cellular receptors for matrix proteins..... 886
characteristics of Na^+/Ca^{2+} exchanger 1199
contraction by TNF 795
endothelin, PDGF secretion..... 1193
immune-mediated injury, prostanoids 273
interleukin-6 is autocrine growth factor..... 249
proliferation and extracellular matrix (abst) 360
proliferation, TxA_2 and prostacyclin 232
proline uptake and protein synthesis, PGE_2 1151
thrombin, fibrinolytic system..... 956
ultrastructure 1211
Mesangium, structure of glomerular..... 30:S-2
Metabolites
extrarenal production of calcitriol..... 29:S-36
of vitamin D..... 29:S-2
reactive oxygen, ARF..... 1125
vitamin D, method of analysis 29:S-28
Microelectrodes, ion specific measures in nanoliters 525
Microhematuria, asymptomatic, unknown etiology (abst)..... 368
Migration inhibition factor in serum sickness nephritis . 1118
Mineral regulation, crystallization inhibitors in kidney ... 625
Mineralocorticoids
kaliuretic response during hypokalemia..... 812
specificity of corticosteroid receptors..... 673
Minimal change disease
hypertrophy predicts progression to FGS..... 115
Model
anti-GBM nephritis, role of granulocytes 86
chimeric mammalian kidney..... 991
cholangiocarcinoma, jaundice 948
comparative molecular, human pepsinogens (abst).... 360
genetic hypertension, Ang II 30:S-92
isolated perfused rat liver and kidney, PTH 55
nephrectomy (abst)..... 552
proximal tubule NaCl and $NaHCO_3$ absorption 605
radiocontrast induced nephropathy 1101

tubular glomerular feedback, Milan hypertensive rats 30:S-102
ureteric catheterization to diagnose pyelonephritis 835
verification of sodium computation (abst) 370
Monoclonal antibody
against GBM heparan sulfate (abst) 1229
OKT3 in transplants (abst) 362
Monocytes, serum sickness nephritis 1118
Mononuclear cell
chronic tubulointerstitial nephritis 736
crescentic GN, IL-2 formation (abst) 556
mRNA cells in podocytes 289
^{99m}Tc-MAG3 clearance, plasma flow (abst) 1231
Murine host vs. graft reaction in GN (abst) 1230
Murine systemic lupus erythropoietin
PAF receptor blockade 1030
Muscle protein degradation, blood and dialyzer membranes 487
Myogenic theory, regulation of renal circulation 571

n-3 fatty acids, PGE metabolism 315
N-desulfated/acetylated heparin in SLE (abst) 1230
Natriuresis
head-out water immersion (abst) 1234
neutral endopeptidase inhibition and ANF 67
Nephrectomy
dietary protein effect on renin-angiotensin system 240
fosinopril treatment 873
models (abst) 552
normotensive rat kidney model 28
transforming growth factor beta 1095
Nephritis
serum sickness, migration inhibition factor 1118
strain-associated protein (abst) 555
Nephrolithiasis (abst) 1236
Nephron, single, acid-base regulation 744
Nephrotic syndrome
cytokines (abst) 557
plasma oncotic pressure, Na excretion (abst) 1229
renal biopsy in elderly (abst) 1236
salt retention in experimental (abst) 368
steroid-responsive 151
steroid-sensitive, children, HLA haplotypes 145
Nephrotoxic nephritis, nitrite synthesis 1056
Nephrotoxicity
cisplatin therapy in children (abst) 365
S3 segment, gentamicin, mild ischemia 459
Netilmicin therapy for infections (abst) 547
Nitrite, nephrotoxic nephritis 1056
Norepinephrine
angiotensin, TGF 30:S-77
cortical, juxtamedullary arterioles, Ang II 30:S-55

Osmosis
across the peritoneal membrane in CAPD 465

Official Journal of the International Society of Nephrology

Le Journal de la Société Internationale de Néphrologie

Table of contents

INVITED CONTRIBUTION

Summary: Symposium on the Organization of Membrane Polarity in Epithelial Cells. *Bernard C. Rossier* 1

RAPID COMMUNICATIONS

Study of rat renal brush border membrane vesicles by flow cytometry. *Timothy G. Hammond* .. 5

Effects of recombinant human erythropoietin on HLA sensitization and cell mediated immunity. *Paul C. Grimm, Levana Sinai-Trieman, Neal M. Sekiya, Linda S. Robertson, Brenda J. Robinson, Richard N. Fine, and Robert B. Ettenger* 12

LABORATORY INVESTIGATION

Hydraulically-induced convective solute transport across the rabbit peritoneum. *Jeffrey L. Bell, John K. Leypoldt, Ronald P. Frigon, and Lee W. Henderson* 19

Absence of glomerular injury or nephron loss in a normotensive rat remnant kidney model. *Anil K. Bidani, Kenneth D. Mitchell, Melvin M. Schwartz, L. Gabriel Navar, and Edmund J. Lewis* 28

Autoradiographic quantification of adrenergic receptors in rat kidney. *Theodore Calianos II and Kathryn H. Muntz* 39

Interaction of arginine vasopressin and angiotensin II on Ca^{2+} in vascular smooth muscle cells. *Carlos Caramelo, Koji Okada, Phoebe Tsai, Stuart L. Linas, and Robert W. Schrier* 47

Metabolism of parathyroid hormone in isolated perfused rat kidney and liver combined. *Henrik Daugaard, Martin Egfjord, and Klaus Olgaard* 55

Identification of calcium-calmodulin multifunctional protein kinase II in rabbit kidney. *Rochelle M. Hanley, Shirish Shenolikar, Jo Pollack, Deborah Steplock, and Edward J. Weinman* 63

Neutral endopeptidase inhibition potentiates the renal actions of atrial natriuretic peptide. *Kenneth B. Margulies, Patricia G. Cavero, Andrea A. Seymour, Norma G. Delaney, and John C. Burnett, Jr.* 67

Regulation of atrial natriuretic peptide receptors in glomeruli during chronic salt loading. *Harald Michel, Harald Meyer-Lehnert, Angela Bäcker, Helgard Stelkens, and Herbert J. Kramer* 73

Clonidine inhibits fluid absorption in the rabbit proximal convoluted renal tubule. *Diane Rouse, Shirley Williams, and Wadi N. Suki* 80

Anti-GBM nephritis in the mouse: Role of granulocytes in the heterologous phase. *Gideon Schrijver, M. José J.T. Bogman, Karel J.M. Assmann, Robert M.W. de Waal, Hannie C.M. Robben, Hans van Gasteren, and Robert A.P. Koene* 86

Oral zeranol shortens the prolonged bleeding time of uremic rats. *Carla Zoja, Gianluigi Viganò, Daniela Corna, Mario Salmona, Giuseppe Remuzzi, and Silvio Garattini* 96

CLINICAL INVESTIGATION

Effects of ACE inhibition in normotensive patients with chronic glomerular disease and normal renal function. *Valeria Bedogna, Enrico Valvo, Patrizia Casagrande, Paolo Braggio, Cristina Fontanarosa, Francesca Dal Santo, Daniele Alberti, and Giuseppe Maschio* 101

Plasma and muscle free amino acids in maintenance hemodialysis patients without protein malnutrition. *Jonas Bergström, Anders Alvestrand, and Peter Fürst* 108

Contents continued on next page

Glomerular hypertrophy in minimal change disease predicts subsequent progression to focal glomerular sclerosis. *Agnes Fogo, Edith P. Hawkins, Phillip L. Berry, Alan D. Glick, Myra L. Chiang, Robert C. MacDonell, Jr., and Iekuni Ichikawa* 115

Lithium treatment reduces the renal kallikrein excretion rate. *Peter Gross, Caroline Reinhard, Marcos Marin-Grez, Edwin Fink, and Heinrich Sauer* 124

Effect of renal replacement therapy on cellular cytokine production in patients with renal disease. *Paul L. Kimmel, Terence M. Phillips, Elizabeth Phillips, and Juan P. Bosch* 129

Renal, metabolic and hormonal responses to ingestion of animal and vegetable proteins. *Panayotis Kontessis, Sharon Jones, Rosemary Dodds, Roberto Trevisan, Romano Nosadini, Paola Fioretto, Mauro Borsato, Davide Sacerdoti, and GianCarlo Viberti* 136

HLA extended haplotypes in steroid-sensitive nephrotic syndrome of childhood. *Clara C. Lagueruela, Thomas L. Buettner, Barbara R. Cole, John M. Kissane, and Alan M. Robson* 145

A regulatory system for soluble immune response suppressor production in steroid-responsive nephrotic syndrome. *H. William Schnaper* 151

TECHNICAL NOTE

Plasma exchange with a rotating filter. *Andre A. Kaplan and Susan E. Halley* 160

NEPHROLOGY FORUM

Measurement of renal function in chronic renal disease. *Andrew S. Levey* 167

INTERNATIONAL SOCIETY OF NEPHROLOGY 185

Meetings 186

Awards and Grants 190

Instructions for Authors on pages xix–xxii

Table of contents

EDITORIAL REVIEW

Renal bone disease 1990: An unmet challenge for the nephrologist. *Hartmut Malluche and Marie-Claude Faugere* 193

LABORATORY INVESTIGATION

Regulation of renal kallikrein synthesis and activation by glucocorticoids. *Ayad A. Jaffa, Donald H. Miller, Ricardo H. Silva, Harry S. Margolius, and Ronald K. Mayfield* 212

Adaptive regulation of taurine transport in two continuous renal epithelial cell lines. *Deborah P. Jones, Leslie A. Miller, and Russell W. Chesney* 219

Atrial natriuretic factor inhibits hypertonic saline-mediated decreases in renal hemodynamics. *John P. Loftus, Margaret M. Redfield, and John C. Burnett, Jr.* 227

Regulation of human mesangial cell growth in culture by thromboxane A_2 and prostacyclin. *Paolo Menè, Hanna E. Abboud, and Michael J. Dunn* 232

Effect of dietary protein on the renin-angiotensin system in subtotally nephrectomized rats. *Mark E. Rosenberg, Stefan M. Kren, and Thomas H. Hostetter* 240

Interleukin 6 is an autocrine growth factor for mesangial cells. *Christian Ruef, Klemens Budde, Jill Lacy, Wolfgang Northemann, Matthias Baumann, R. Bernd Sterzel, and David L. Coleman* 249

Site of restoration of the effect of PTH by propanolol in respiratory alkalosis. *Apolonia Rybczyńska, Theresa J. Berndt, Anzelm Hoppe, and Franklyn G. Knox* 258

Entactin: A possible auto-antigen in the pathogenesis of non-Goodpasture anti-GBM nephritis. *Ramesh Saxena, Per Bygren, Ralph Butkowski, and Jörgen Wieslander* 253

Immune-mediated mesangial cell injury—Biosynthesis and function of prostanoids. *Rolf A.K. Stahl, Friedrich Thaiss, Sabine Kahf, Wilhelm Schoeppe, and Udo M. Helmchen* 273

Role of intrinsic antioxidant enzymes in renal oxidant injury. *Toshimasa Yoshioka, Teresa Bills, Tracy Moore-Jarrett, Harry L. Greene, Ian M. Burr, and Iekuni Ichikawa* 282

CLINICAL INVESTIGATION

Expression of CRl (CD35) mRNA in podocytes from adult and fetal human kidneys. *Marie-Dominique Appay, Michel D. Kazatchkine, Matthieu Levi-Strauss, Nicole Hinglais, and Jean Bariety* 289

Image-guided ^{31}P magnetic resonance spectroscopy of normal and transplanted human kidneys. *Michael D. Boska, Dieter J. Meyerhoff, Donald B. Twieg, Gregory S. Karczmar, Gerald B. Matson, and Michael W. Weiner* 294

Acute increase in plasma osmolality as a cause of hyperkalemia in patients with renal failure. *Giuseppe Conte, Antonio Dal Canton, Paola Imperatore, Luca De Nicola, Giuseppe Gigliotti, Nicola Pisanti, Bruno Memoli, Giorgio Fuiano, Ciro Esposito, and Vittorio E. Andreucci* 301

iPTH values during hemodialysis: Role of ionized Ca, dialysis membranes and iPTH assays. *Pierre D'Amour, Jacques Jobin, Lucie Hamel, and Nathalie L'Écuyer* 308

Effects of n-3 fatty acids on renal function and renal prostaglandin E metabolism. *Rainer Düsing, Ansgar Struck, Bernd O. Göbel, Burkhard Weisser, and Hans Vetter* 315

Contents continued on next page

Hepatitis C infection in two urban hemodialysis units. *Lennox J. Jeffers, Guido O. Perez, Maria D. de Medina, Carmen J. Ortiz-Interian, Eugene R. Schiff, K. Rajender Reddy, Margarita Jimenez, Jacques J. Bourgoignie, Carlos A. Vaamonde, Robert Duncan, Michael Houghton, George-Lim Choo, and George Kuo* 320

Polymeric IgA and immune complex concentrations in IgA-related renal disease. *Colin L. Jones, Harley R. Powell, Priscilla Kincaid-Smith, and Don M. Roberton* 323

Immunoglobulin heavy chain switch region gene polymorphisms in glomerulonephritis. *Richard H. Moore, Graham A. Hitman, Renato A. Sinico, Jukka Mustonen, Julia Medcraft, Ekundayo Y. Lucas, Nicholas T. Richards, Michael C. Venning, John Cunningham, Frank P. Marsh, and Giuseppe D'Amico* 332

Optimization of high-efficiency hemodialysis by detection and correction of fistula dysfunction. *David W. Windus, Jean Audrain, Rosie Vanderson, Martin D. Jendrisak, Daniel Picus, and James A. Delmez* 337

TECHNICAL NOTE

A blood protein monitor for the continuous measurement of blood volume changes during hemodialysis. *Daniel Schneditz, Helmuth Pogglitsch, Jörg Horina, and Ulrich Binswanger* 342

Percutaneous renal biopsy utilizing real time, ultrasonic guidance and a semiautomated biopsy device. *David A. Wiseman, Ralph Hawkins, Leonard M. Numerow, and Kenneth J. Taub* 347

NEPHROLOGY FORUM

Immunoadsorption in the sensitized transplant recipient. *David Taube* 350

INVITED CONTRIBUTION

Summary: Symposium on Lymphocyte Activation. *Jean-François Bach* 381

EDITORIAL REVIEW

Is glomerulosclerosis a consequence of altered glomerular permeability to macromolecules? *Giuseppe Remuzzi and Tullio Bertani* 384

LABORATORY INVESTIGATION

Glomerular basement membrane degradation by endogenous cysteine proteinases in isolated rat glomeruli. *William H. Baricos, Shirley L. Cortez, Quoc C. Le, Youwen Zhou, Rudene M. Dicarlo, Sally E. O'Connor, and Sudhir V. Shah* 395

Adrenergic regulation of (Na^+, K^+)-ATPase activity in proximal tubules of spontaneously hypertensive rats. *Robert E. Beach and Thomas D. DuBose, Jr* 402

Effect of chronic respiratory acidosis on urinary calcium excretion in the dog. *Vincent J. Canzanello, Magnus Bodvarsson, Jeffrey A. Kraut, Conrado A. Johns, Eduardo Slatopolsky, and Nicolaos E. Madias* 409

Differing regulation and function of ICAM-1 and class II antigens on renal tubular cells. *Anthony M. Jevnikar, Rudolf P. Wuthrich, Fumio Takei, Hong-Wu Xu, Daniel C. Brennan, Laurie H. Glimcher, and Vicki E. Rubin-Kelley* 417

Renin release from microdissected superficial, midcortical, and juxtamedullary afferent arterioles in rabbits. *Noboru Nushiro, Sadayoshi Ito, and Oscar A. Carretero* 426

Nephron function in the early phase of ischemic renal failure. Significance of erythrocyte trapping. *P. Olof A. Hellberg, Örjan Källskog, and Mats Wolgast* 432

Effect of acute stimulation of renin secretion on renal renin content in vivo. *John A. Opsahl, Paul A. Abraham, and Stephen A. Katz* 440

Role of enhanced glomerular synthesis of thromboxane A_2 in progressive kidney disease. *Patricia Salvati, Corrado Ferti, Romana G. Ferrario, Ernesto Lamberti, Liliana Duzzi, Giuseppe Bianchi, Giuseppe Remuzzi, Norberto Perico, Ariela Benigni, Paola Braidotti, Guido Coggi, Francesco Pugliese, and Carlo Patrono* 447

Mild ischemia predisposes the S3 segment to gentamicin toxicity. *David M. Spiegel, Paul F. Shanley, and Bruce A. Molitoris* 459

A phenomenological interpretation of the variation in dialysate volume with dwell time in CAPD. *Gunnar Stelin and Bengt Rippe* 465

Proximal nephron and renal effects of DuP 753, a nonpeptide angiotensin II receptor antagonist. *Ming-Hong Xie, Fu-Ying Liu, Pancras C. Wong, Pieter B.M.W.M. Timmermans, and Martin G. Cogan* 473

CLINICAL INVESTIGATION

Improvement of brain function in hemodialysis patients treated with erythropoietin. *Georg Grimm, Felix Stockenhuber, Bruno Schneeweiss, Christian Madl, Josef Zeitlhofer, and Barbara Schneider* . 480

Contents continued on next page

Effect of in vivo contact between blood and dialysis membranes on protein catabolism in humans. *Alberto Gutierrez, Anders Alvestrand, John Wahren, and Jonas Bergström* 487

Peritoneal transport in CAPD patients with permanent loss of ultrafiltration capacity. *Olof Heimbürger, Jacek Waniewski, Andrzej Werynski, Anders Tranæus, and Bengt Lindholm*..... 495

Removal of an inorganic acid load in subjects with ketoacidosis of chronic fasting. *Kamel S. Kamel, Jean H. Ethier, Bobby J. Stinebaugh, Francis X. Schloeder, and Mitchell L. Halperin*.. 507

Atrial natriuretic factor in the acute nephritic and nephrotic syndromes. *Bernardo Rodríguez-Iturbe, Danica Colic, Gustavo Parra, and Jolanta Gutkowska, with the technical assistance of Anibal Bermúdez* 512

Angiotensin II receptor regulation in anti-glomerular basement membrane nephritis. *Vicky Timmermans, Philip W. Peake, John A. Charlesworth, Graham J. Macdonald, and Monika A. Pawlak*.... 518

TECHNICAL NOTE

Measurement of Na^+ and K^+ in nanoliter droplets by ion-specific microelectrodes. *James S. Kaufman, Thomas P. Costello, and Robert J. Hamburger*..... 525

NEPHROLOGY FORUM

Renal biopsy. *Michael P. Madaio* 529

Update on Vitamin D: 1990

Table of contents

Introduction. *Eduardo Slatopolsky* S-1

The vitamin D system: 1990. *Hector F. DeLuca, Johann Krisinger, and Hisham Darwish* S-2

Immunomodulating properties of 1,25-dihydroxyvitamin D_3. *Stavros C. Manolagas, Frank G. Hustmyer, and Xiao-Peng Yu* S-9

Vitamin D and bone. *Paula H. Stern* S-17

New active analogues of vitamin D with low calcemic activity. *Alex J. Brown, Jane L. Finch, Silvia Lopez-Hilker, Adriana Dusso, Cynthia Ritter, Nidia Pernalete, and Eduardo Slatopolsky.* S-22

Improved methodology for the analysis of plasma vitamin D metabolites. *Ronald L. Horst, Timothy A. Reinhardt, and Bruce W. Hollis* S-28

Extrarenal production of calcitriol. *Adriana Dusso, Jane Finch, James Delmez, Neville Rapp, Silvia Lopez-Hilker, Alex Brown, and Eduardo Slatopolsky* S-36

The parathyroid-calcitriol axis in health and chronic renal failure. *Eduardo Slatopolsky, Silvia Lopez-Hilker, James Delmez, Adriana Dusso, Alex Brown, and Kevin J. Martin* S-41

Effects of $1,25(OH)_2D_3$ administration on bone in patients with renal failure. *Hartmut H. Malluche and Marie-Claude Faugere* S-48

Use of oral and parenteral calcitriol in the treatment of renal osteodystrophy. *Jack W. Coburn* . S-54

Parathyroidectomy in chronic renal failure: Indications, surgical approach and the use of calcitriol. *Francisco Llach* S-62

RENAL REGULATION OF EXTRACELLULAR FLUID COMPOSITION

SYMPOSIUM IN HONOR OF DONALD W. SELDIN, M.D.

Introduction. *Harry R. Jacobson and Floyd C. Rector, Jr.* 569

Biography of Donald W. Seldin, M.D. *Floyd C. Rector, Jr.* 570

Regulation of the renal circulation. *Jay H. Stein* 571

Physiologic adaptations of the tubuloglomerular feedback system. *Ronald C. Blantz, Scott C. Thomson, Orjan W. Peterson, and Francis B. Gabbai* 577

Reclamation of filtered bicarbonate. *Thomas D. DuBose, Jr.* 584

Influence of converting enzyme inhibition of glomerular filtration rate and proteinuria. *José L. Rodicio, José M. Alcazar and Luis M. Ruilope* 590

Role of branched-chain ketoacids in protein metabolism. *Mackenzie Walser* 595

Cellular model of proximal tubule NaCl and $NaHCO_3$ absorption. *Orson W. Moe, Patricia A. Preisig, and Robert J. Alpern* 605

Endothelial factors in the regulation of renin release. *William B. Campbell and William L. Henrich* 612

Cellular mechanisms of prostaglandin E_2 and vasopressin interactions in the collecting duct. *Matthew D. Breyer, Harry R. Jacobson, and Richard L. Hebert* 618

Defenses of an unstable compromise: Crystallization inhibitors and the kidney's role in mineral regulation. *Fred Coe and Joan H. Parks* 625

Cellular and molecular aspects of the renal effects of diuretic agents. *Manuel Martinez-Maldonado and Hector R. Cordova* 632

Determinants of renal damage in rats with systemic hypertension and partial renal ablation. *Edilia Tapia, Francis B. Gabbai, Consuelo Calleja, Martha Franco, José L. Cermeño, Norma A. Bobadilla, Jóse M. Pérez, Juan A. Alvarado, and Jaime Herrera-Acosta* 642

Structural properties of vacuolar proton pumps. *Dennis K. Stone, Bill P. Crider, and Xiao-Song Xie* 649

Factors governing sodium and chloride transport across the inner medullary collecting duct. *Antonino S. Rocha and Lúcia H. Kudo* 654

Organization of collecting duct intercalated cells. *Victor L. Schuster* 668

Inhibition of 11β-hydroxysteroid dehydrogenase and its effect on epithelial sodium transport. *Klaus Hierholzer, Harald Siebe, and Michael Fromm* 673

Sodium and potassium transport by the collecting duct. *John B. Stokes* 679

Heterogeneity of the descending thin limb of Henle's loop. *Masashi Imai and Koji Yoshitomi* ... 687

Countercurrent system. *Jeff M. Sands and Juha P. Kokko* 695

Renal control of extracellular calcium. *Diane Rouse and Wadi N. Suki* 700

Catastrophic medical events with exhaustive exercise: "White collar rhabdomyolysis". *James P. Knochel* 709

Disorders of distal acidification. *Neil A. Kurtzman* 720

Contents continued on next page

Renal handling of citrate. *L. Lee Hamm* 728

Chronic tubulo-interstitial nephritis: Correlation between structural and functional findings. *Garabed Eknoyan, Mary Anne McDonald, Debra Appel, and Luan D. Truong* 736

NEPHROLOGY FORUM

Single-nephron studies: Implications for acid-base regulation. *David Z. Levine* 744

EDITORIAL REVIEW

Glomerular blood flow. *Michael Steinhausen, Karlhans Endlich, and David L. Wiegman* 769

LABORATORY INVESTIGATION

Reactive oxygen molecule-mediated injury in endothelial and renal tubular epithelial cells in vitro. *Sharon P. Andreoli and James A. McAteer, with the technical assistance of Coleen Mallett* ... 785

Tumor necrosis factor induces contraction of mesangial cells and alters their cytoskeletons. *Giovanni Camussi, Ernesto Turello, Ciro Tetta, Federico Bussolino, and Corrado Baglioni* 795

Cytosolic calcium and protein kinase C reduce complement-mediated glomerular epithelial injury. *Andrey V. Cybulsky, Joseph V. Bonventre, Richard J. Quigg, Wilfred Lieberthal, and David J. Salant* 803

Nephron site responsible for the reduced kaliuretic response to mineralocorticoids during hypokalemia in rats. *Jean H. Ethier, Ursula Honrath, Anthony Veress, Harald Sonnenberg, and Mitchell L. Halperin* 812

Arginine vasopressin gene expression in chronic cardiac failure in rats. *Jin K. Kim, Jean-Baptiste Michel, Florent Soubrier, Jacques Durr, Pierre Corvol, and Robert W. Schrier* 818

Effect of a serotonin blocking agent on renal hemodynamics in the normal rat. *Norbert H. Lameire, Erve Matthys, Dirk Kesteloot, and Marie-Anne Waterloos* 823

Localization of 90-kDa heat shock protein in the kidney. *Osamu Matsubara, Tsutomu Kasuga, Fumiaki Marumo, Hideaki Itoh, and Yohtalou Tashima* 830

Ureteric catheterization in the diagnosis of pyelonephritis—An experimental evaluation. *Thomas E. Miller, Glenne Findon, J. Priyantha Lecamwasam, and Paul Yap* 835

Effects of probucol on renal function in rats with bilateral ureteral obstruction. *Kulwant S. Modi, Jerry Morrissey, Sudhir V. Shah, George F. Schreiner, and Saulo Klahr* 843

Three-dimensional morphometric analysis of segmental glomerulosclerosis in the rat. *Andrea Remuzzi, Rossana Pergolizzi, Michael S. Mauer, and Tullio Bertani* 851

Tracer kinetics and actions of oral and intraperitoneal 1,25-dihydroxyvitamin D_3 administration in rats. *Reinhold Vieth, Sang Whay Kooh, J. Williamson Balfe, Myrna Rawlins, and William W. Tinmouth* 857

Glomerular angiotensinase A in the rat: Increase of enzyme activity following renal ablation. *Gunter Wolf, Friedrich Thaiss, Jürgen E. Scherberich, Wilhelm Schoeppe, and Rolf A.K. Stahl* ... 862

CLINICAL INVESTIGATION

Albuterol and insulin for treatment of hyperkalemia in hemodialysis patients. *Michael Allon and Charles Copkney* 869

Fosinopril prevents hyperfiltration and decreases proteinuria in post-transplant hypertensives. *Tommaso Bochicchio, Guadalupe Sandoval, Oscar Ron, Héctor Pérez-Grovas, Javier Bordes, and Jaime Herrera-Acosta* 873

Contents continued on next page

Congenital hepatic fibrosis in autosomal-dominant polycystic kidney disease. *Jan M. Cobben, Martijn H. Breuning, Coen Schoots, Leo P. ten Kate, and Klaus Zerres* 880

Cellular receptors for matrix proteins in normal human kidney and human mesangial cells. *Fernando G. Cosio, Daniel D. Sedmak, and N. Stanley Nahman, Jr.* 886

L-Lactate high-efficiency hemodialysis: Hemodynamics, blood gas changes, potassium/phosphorus, and symptoms. *Sanjay Dalal, Alex W. Yu, Dinesh K. Gupta, Pran M. Kar, Todd S. Ing, and John T. Daugirdas* 896

Multicenter trial of L-carnitine in maintenance hemodialysis patients. I. Carnitine concentrations and lipid effects. *Thomas A. Golper, Marsha Wolfson, Suhail Ahmad, Raimund Hirschberg, Paul Kurtin, Lois Anne Katz, Robert Nicora, Don Ashbrook, and Joel D. Kopple* 904

Multicenter trial of L-carnitine in maintenance hemodialysis patients. II. Clinical and biochemical effects. *Suhail Ahmad, H. Thomas Robertson, Thomas A. Golper, Marsha Wolfson, Paul Kurtin, Lois A. Katz, Raimund Hirschberg, Robert Nicora, Donald W. Ashbrook, and Joel D. Kopple.* 912

Effects of recombinant human erythropoietin on cerebral and cutaneous blood flow and on blood coagulability. *William J. Johnson, James T. McCarthy, Takehiko Yanagihara, Philip J. Osmundson, Duane M. Ilstrup, Bernice M. Jenson, and E.J. Walter Bowie* 919

Gene mapping in Alport families with different basement membrane antigenic phenotypes. *Clifford E. Kashtan, Stephen S. Rich, Alfred F. Michael, and Berengere de Martinville* 925

Soft tissue calcification in pediatric patients with end-stage renal disease. *Dawn S. Milliner, Alan R. Zinsmeister, Ellin Lieberman, and Benjamin Landing* 931

Influence of calcium acetate or calcium citrate on intestinal aluminum absorption. *Charles R. Nolan, Joseph R. Califano, and Clifford A. Butzin* 937

Early and late adjustment to potassium loading in humans. *Ton J. Rabelink, Hein A. Koomans, Ronald J. Hené, and Evert J. Dorhout Mees* 942

Renal function in obstructive jaundice in man: Cholangiocarcinoma model. *Visith Sitprija, Udomporn Kashemsant, Amnach Sriratanaban, Sillawat Arthachinta, and Vichai Poshyachinda* .. 948

Thrombin regulates components of the fibrinolytic system in human mesangial cells. *Luis Miguel Villamediana, Eric Rondeau, Ci-Jiang He, Robert L. Medcalf, Marie-Noëlle Peraldi, Roger Lacave, Françoise Delarue, and Jean-Daniel Sraer* 956

Effects of dialysis membranes on beta$_2$-microglobulin production and cellular expression. *Philippe M. Zaoui, William J. Stone, and Raymond M. Hakim* 962

TECHNICAL NOTE

Development of a new radioimmunoassay for erythropoietin using recombinant erythropoietin. *Meredith Mason-Garcia, Barbara S. Beckman, Jesse W. Brookins, Jerry S. Powell, Wayne Lanham, Steve Blaisdell, Len Keay, Su-Chen Li, and James W. Fisher* 969

Regional citrate anticoagulation for continuous arteriovenous hemodialysis in critically ill patients. *Ravindra L. Mehta, Brian R. McDonald, May M. Aguilar, and David M. Ward* 976

RAPID COMMUNICATION

Anaphylactoid reactions during hemodialysis on AN69 membranes in patients receiving ACE inhibitors. *Christian Tielemans, Philippe Madhoun, Michele Lenaers, Liliane Schandene, Michel Goldman, and Jean-Louis Vanherweghem* 982

H-K-ATPase immunoreactivity in cortical and outer medullary collecting duct. *Charles S. Wingo, Kirsten M. Madsen, Adam Smolka, and C. Craig Tisher* 985

Creation of a functioning chimeric mammalian kidney. *Adrian S. Woolf, Stephen J. Palmer, Michael L. Snow, and Leon G. Fine* 991

Renovascular Effects of Angiotensin II

Budapest, Hungary

July 16–19, 1989

Table of contents

INTRODUCTION. *László Rosivall, Roland C. Blantz, and L. Gabriel Navar* S-1

MORPHOLOGY AND STRUCTURE

Structure of the glomerular mesangium: A biomechanical interpretation. *Wilhelm Kriz, Marlies Elger, Kevin Lemley, and Tatsuo Sakai* S-2

Morphology and function of the distal part of the afferent arteriole. *László Rosivall* S-10

Morphological observations on the extracellular space in the macula densa of the mouse kidney. *Szabolcs Gomba, Éva Varga, and István Mórocz* S-16

CELL AND MOLECULAR BIOLOGY OF THE INTRARENAL RENIN-ANGIOTENSIN SYSTEM

Molecular biology of the renal renin-angiotensin system. *R. Ariel Gomez, Robert L. Chevalier, Robert M. Carey, and Michael J. Peach* S-18

Renal metabolism of angiotensin I and II. *Ervin G. Erdös and Randal A. Skidgel* S-24

Angiotensin I-forming angiotensinogenases in extrarenal vasculature and in the kidney. *Herbert Dahlheim, Michael Thurnreiter, Michael Plaschke, Ivan Durasin, Wolfgang Reiter, and Julian Rosenthal* S-28

Intracellular formation and release of angiotensins from juxtaglomerular cells. *Tadashi Inagami, Kenji Mizuno, Kiyoko Naruse, Tomio Okamura, and Minoru Kawamura* S-33

On the intrarenal regulation of renin release from the juxtaglomerular apparatus. *Ole Skøtt, Josephine P. Briggs, John N. Lorenz, and Horst Weihprecht* S-38

CELLULAR MECHANISMS OF ACTION OF ANGIOTENSIN II

Signaling mechanisms coupled to the angiotensin receptor of proximal tubular epithelium. *Janice G. Douglas, Michael Romero, and Ulrich Hopfer* S-43

Calcium-activated chloride conductance of mesangial cells. *Kiyoshi Kurokawa and Toshihiro Okuda* S-48

Effects of angiotensin II on intracellular calcium and electrical function of mouse renal juxtaglomerular cells. *Armin Kurtz and Reinhold Penner* S-51

ACTIONS OF ANGIOTENSIN II ON RENAL MICROVASCULATURE

Different responses of cortical and juxtamedullary arterioles to norepinephrine and angiotensin II. *Michael Steinhausen, David Ballantyne, Matthias Fretschner, Johannes Hoffend, and Niranjan Parekh, with the technical assistance of Rudolf Dussel* S-55

Arteriolar renin and vascular effects of angiotensin II in juxtamedullary nephrons. *Daniel Casellas, Pamela K. Carmines, Madeleine Dupont, Patrick Redon, and Leon C. Moore* S-60

Renal hemodynamic regulation by the renin-secreting segment of the afferent arteriole. *Leon C. Moore, Daniel Casellas, A. Erik G. Persson, Roland Müller-Suur, and Peter Morsing* S-65

INTRARENAL PHYSIOLOGIC ROLE OF ANGIOTENSIN II

Interactive effects of angiotensin II on renal hemodynamics and tubular reabsorptive function. *Kenneth D. Mitchell and L. Gabriel Navar* S-69

Contents continued on next page

Effect of a converting enzyme inhibitor, angiotensin II, and saralasin on glomerular hemodynamics. *Jiří Heller and Vladislav Horáček* S-74

Effect of angiotensin and other pressor agents on tubuloglomerular feedback responses. *Jürgen Schnermann and Josie P. Briggs* S-77

ANGIOTENSIN INTERACTIONS WITH HORMONAL AND NEURAL SYSTEMS

Angiotensin II and thromboxane in the regulation of blood pressure and renal function. *Christopher S. Wilcox and William J. Welch* S-81

Adrenergic influences and interactions with angiotensin II. *Roland C. Blantz, Francis B. Gabbai, Scott C. Thomson, and Bryan J. Tucker* S-84

Intra-renal interactions between angiotensin II and atrial natriuretic factor. *Peter J. Harris and Sandford L. Skinner* S-87

ROLE OF ANGIOTENSIN II IN HYPERTENSION

Role of angiotensin in the renal vasoconstriction observed during the development of genetic hypertension. *William J. Arendshorst, Christos Chatziantoniou, and Frederick H. Daniels* S-92

Influences of angiotensin on renal function in renal vascular hypertension. *David W. Ploth* S-97

The tubuloglomerular feedback mechanism in Milan hypertensive rats. *A. Erik G. Persson, Peter Morsing, and Ulf Boberg* S-102

Atrial natriuretic peptide in normal and low renin essential hypertension. *Orlin Sergev, Károly Rácz, Ibolya Varga, Róbert Kiss, László Fütő, and Edit Gláz* S-107

ROLE OF ANGIOTENSIN II IN PATHOPHYSIOLOGIC CONDITIONS

Angiotensin II and the maintenance of GFR and renal blood flow during renal artery narrowing. *Warwick P. Anderson, Kate M. Denton, Robyn L. Woods, and Daine Alcorn* S-109

The renin-angiotensin system and renal function in kidney transplantation. *Albert Mimran, Georges Mourad, and Jean Ribstein* S-114

Angiotensin converting enzyme inhibitors and progression of chronic renal failure. *Jonathan P. Tolins and Leopoldo Raij* S-118

Role of angiotensin II in altered glomerular hemodynamics in congestive heart failure. *Iekuni Ichikawa, Toshimasa Yoshioka, Agnes Fogo, and Valentina Kon* S-123

Table of contents

EDITORIAL REVIEW

Mechanisms of cell volume regulation by the mouse medullary thick ascending limb of Henle. *Adam M. Sun, Samuel N. Saltzberg, Deepak Kikeri, and Steven C. Hebert* 1019

LABORATORY INVESTIGATION

Platelet activating factor receptor blockade ameliorates murine systemic lupus erythematosus. *Elisabetta Baldi, Steven N. Emancipator, Medhat O. Hassan, and Michael J. Dunn, with the technical assistance of Edith Hanzmann* 1030

Mesangial cell accessory functions: Mediation by intercellular adhesion molecule-1. *Daniel C. Brennan, Anthony M. Jevnikar, Fumio Takei, and Vicki E. Reubin-Kelley* 1039

Effect of leukocyte stimulation on rabbit immune complex glomerulonephritis. *Giovanni Camussi, Ciro Tetta, Federico Bussolino, Ernesto Turello, Jan Brentjens, Giuseppe Montrucchio, and Giuseppe Andres* 1047

Glomeruli synthesize nitrite in experimental nephrotoxic nephritis. *Victoria Cattell, Terence Cook, and Salvador Moncada* 1056

Effects of acute and chronic uremia on active cation transport in rat myocardium. *Wilfred Druml, Ralph A. Kelly, Brian K. England, Donald S. O'Hara, and William E. Mitch* 1061

Importance of angiogenic action of angiotensin II in the glomerular growth of maturing kidneys. *Agnes Fogo, Yoshiyuki Yoshida, Aida Yared, and Iekuni Ichikawa* 1068

Quantitative studies of tubular immune complex formation and clearance in rats. *Takeo Ishidate, Harry J. Ward, and John R. Hoyer* 1075

Somatosensory evoked potentials in acute renal failure: Effect of parathyroidectomy. *Fumio Kanda, Kenji Jinnai, Kazuo Tada, and Takuo Fujita* 1085

Induction of IL-1 during hemodialysis: Transmembrane passage of intact endotoxins (LPS). *Maryline Laude-Sharp, Martine Caroff, Laurent Simard, Christian Pusineri, Michel D. Kazatchkine, and Nicole Haeffner-Cavaillon* 1089

Expression of transforming growth factor-β1 and β2 in rat glomeruli. *Karen MacKay, Paturu Kondaiah, David Danielpour, Howard A. Austin III, and Peter D. Brown* 1095

Induction and prevention of radiocontrast-induced nephropathy in dogs with heart failure. *Kenneth B. Margulies, Linda J. McKinley, Patricia G. Cavero, and John C. Burnett, Jr* 1101

Dietary deficiency of antioxidants exacerbates ischemic injury in the rat kidney. *Karl A. Nath and Mark S. Paller, with the technical assistance of Anthony J. Croatt* 1109

Migration inhibition factor in acute serum sickness nephritis. *Gustavo Parra, Jesús Mosquera, and Bernardo Rodriguez-Iturbe, with the technical assistance of Disraeli Salazar and Elieth Pozo* 1118

Reactive oxygen metabolites in endotoxin-induced acute renal failure in rats. *Patrick D. Walker and Sudhir V. Shah* 1125

ANP inhibits Na^+-H^+ antiport in proximal tubular brush border membrane: Role of dopamine. *Joseph Winaver, John C. Burnett, Gertrude M. Tyce, and Thomas P. Dousa* 1133

Effect of aluminum on bone matrix inductive properties. *Jian-Min Zhu, William Huffer, and Allen C. Alfrey* 1141

CLINICAL INVESTIGATION

Glucose-induced insulin secretion in uremia: Effects of aminophylline infusion and glucose loads. *Vincenzo Allegra, Giacomo Mengozzi, Lucia Martimbianco, and Alfonso Vasile* 1146

Contents continued on next page

Effect of prostaglandin E_2 on proline uptake and protein synthesis by cultured human mesangial cells. *Nicole Ardaillou, Marie-Paule Nivez, Georges Bellon, Christian Combe, and Raymond Ardaillou* 1151

Hyperkalemia in acute glomerulonephritis due to transient hyporeninemic hypoaldosteronism. *Burl R. Don and Morris Schambelan* 1159

Hepatitis B vaccination and interleukin 2 receptor expression in chronic renal failure. *Hubert Dumann, Stefan Meuer, Karl-Hermann Meyer zum Büschenfelde, and Hans Köhler* 1164

Imaging of dialysis-related amyloid (AB-amyloid) deposits with ^{131}I-β_2-microglobulin. *Jürgen Floege, Wolfgang Burchert, Almuth Brandis, Peter Gielow, Barbara Nonnast-Daniel, Ernst Spindler, Heinz Hundeshagen, Stanley Shaldon, and Karl-Martin Koch* 1169

Renal structure and hypertension in autosomal dominant polycystic kidney disease. *Patricia A. Gabow, Arlene B. Chapman, Ann M. Johnson, Douglas J. Tangel, Irene T. Duley, William D. Kaehny, Michael Manco-Johnson, and Robert W. Schrier* 1177

Effect of conjugated estrogens on platelet function in prostacyclin generation in CRF. *Max Heistinger, Felix Stockenhuber, Barbara Schneider, Ingrid Pabinger, Brigitte Brenner, Brunhilde Wagner, Peter Balcke, Klaus Lechner, and Paul A. Kyrle* 1181

Pathophysiological aspects of edema formation in diabetic nephropathy. *Eva Hommel, Elisabeth R. Mathiesen, Knut Aukland, and Hans-Henrik Parving* 1187

Endothelin stimulates PDGF secretion in cultured human mesangial cells. *Fatima E. Jaffer, Thomas C. Knauss, Earl Poptic, and Hanna E. Abboud* 1193

Identification and characteristics of a Na^+/Ca^{2+} exchanger in cultured human mesangial cells. *Paolo Menè, Francesco Pugliese, Tullio Faraggiana, and Giulio A. Cinotti* 1199

TECHNICAL NOTE

An in vivo approach to the study of macula densa-mediated glomerular hemodynamics. *Sadayoshi Ito and Oscar A. Carretero* 1206

Ultrastructure of glomerular mesangial matrix by quick-freeze and deep-etch methods. *Hiroya Takami, Atsuhiko Naramoto, Kou Nakazawa, Hidekazu Shigematsu, and Shinichi Ohno* 1211

NEPHROLOGY FORUM

Immunoregulatory factors in the pathogenesis of IgA nephropathy. *Steven N. Emancipator* 1216
